Beyond Agile

Discover a breakthrough process for rapid software development and growth.

✓ Proven   ✓ Effective   ✓ Scalable

Vastly accelerate software development. Grow even faster.

An intimate, one-day workshop with Peter Cronin, Australian and NZ Director of ViAGO.

This is an opportunity to spend a day with Peter Cronin, in an upscale conference room, in the company of 15 of your peers (owners and senior executives from mid-sized businesses).

The objective will be for each executive, over the course of the day, to fashion a simple (but detailed) plan to accelerate software output and scale at high speed.

Investment

Auckland - 28th Apr

Wellington - 30th April

Primary delegate $298 | Secondary delegate $198

Agenda

Registration: 8.45am

Morning session: 9.00am - lunch

Discover the need for speed
Fast-growth and rapid-change. It's the new normal for software development in every industry. Discover how Beyond Agile offers a repeatable process to harness that and out-innovate the competition.

Agile: necessary but not sufficient
Agile's iterative approach overtook Waterfall as the leading software development management process. Regular sprints coupled with feedback loops and cross-collaboration have driven vast improvements, but the new normal is now exposing their functional and productive limits. What is needed is a system of Steady Pace.

Achieving Steady Pace
It's clear we must increase the speed and quality of development to meet short-term and long-term growth goals. The good news is that it's possible to implement process and software changes to smooth the flow of work through the business, get control over workload, and maximise the output and value of your most limited resource.

Lunch
Enjoy a delicious lunch and drinks. Pick Peter's brain if you want.

Afternoon session: post-lunch - 4.00pm

The role of management
A market characterised by rapid change has equally important implications for executive problem-solving. Institutional knowledge rapidly becomes outdated and holds back the effectiveness of solutions. A dramatically different approach offers executives the potential to break out of old patterns, and quickly and reliably create solutions that will revolutionise the marketplace.

We will do a session on application right here, and solve some of your organisation's most-persistent software development problems.

Case study: 4.00pm - 5.00pm

A $10bn use case
How it's come together for Australia's biggest ASX-listed tech company. You'll see how they accelerated innovation and output, and permanently changed the logistics industry, and why they've left all their competitors eating dust as they've scaled from $10m in sales to a $10b market cap in just 10 years.

Post-workshop drinks: 5.00pm – 5.45.pm
You are welcome to stay on for a post-workshop drink with Peter and chat with him and fellow delegates.
